

I am writing to petition the new broadcast service called LPFM that could affect K-Love's ability to service my local area. K-Love has been a wonderful inspiration to me! Even though it is a nationally syndicated station it provides local news and information and has continuously kept me informed on local events that are of interest to me. Above all else K-Love serves the community by providing family friendly news, music, and education. It also provides incredible messages of hope, wisdom, and practical applications that are essential to a healthy lifestyle. Additionally, because K-Love is nationally broadcast it connects all the communities together into one giant community. If it were to be displaced by an LPFM broadcaster it would affect not only the local community it serves but the overall community nationally as well since it would then be scattered and disconnected. It would especially have a devastating effect on existing listeners who tune into it exclusively since very few local stations provide the caliber of programming that K-Love does. It would also prevent other people, new listeners, from the benefit of all the wonderful attributes it has to offer. Therefore, I believe it is in the best public interest to PREVENT Low Power FM from and a "Localism" campaign that would jeopardize the effectiveness of K-Love and its current programming locally and nationally.
